

More

more quizz

Dr is so cute hehe

would like to have more quizzes and videos

gained an insight into the evolution of technology, especially regarding the usage of computers & cloud services and innovations that will become mainstream soon

More quizz please

more quizez! hehehehe

Learned a lot of IT infra and the drivers behind current trends like cloud computing and virtualization is a little bit confusing

lect inter

learned. want more quizzes for next class!

next class!!

More quizziz plss

helpful too but I would also like to have group discussions too. From chapter 1 I have learned more about IT infrastructure and its development in current era and more regarding the software as well. love the way you teaching

computer application not easy T_T I must put more effort on it

more quizziz

Dr voice is soft

I would like more quiz in Chapter 1

more quiz, is helpful

Quizziz is pretty fun and functional for us to refresh our memories about the syllabus :D

quizzes are pretty helpful in understanding this chapter :)

I understand but not really because I'm bad in English

Dr has a beautiful smile

more quizz

quizziz without time limitation XD

I learned the basics of computer hardware, software, and networking. It was interesting the way Dr taught us. Easily understood. I really enjoy this class it was fun.

The quiz in Kahoot is entertaining and helpful for me to know how far I understood. The knowledge I gained from this class is superb new and interesting.

want more quizz for next class because for me can understand better.

good quizziz, can more memorize

Quizzes are fun and help to recall what we have learnt.

the quiz is so interesting!! even though I didn't get to score full mark, I still had fun <3

already buy the books

more quizziz

pre-class Quizz sessions would be helpful tbh

#AnnounceGroupAssignments

Class was fun, lecturer provide plenty of examples :D. Maybe next time Dr may consider random pick student to answer question or quiz, so I will be more aware and pay more attention HAHA no basic for IT

I understood this chapter well and expect to have more and more quizziz as they help me to understand this chapter well...

I'd rather volunteer to answer instead of name picking

computer management / application is not my cup of tea, however I enjoy your classes

I hate any subject that has got to do with IT initially but so far so good with the help of Dr.

Read more, learn more!

It is hard :)

There are a lot of things to about throughout the classes and I think it is fun to have some quizzes once in a while

When I was first time join this class, I think that computer application is quite easy to learn. Because I weak in English, it's quite hard to understand the syllabus. So I need to watch recording to revise again the syllabus. It's quite funny when listening to Dr talk. And also quizz also help me so much. xDD

y dlt

Quizz was fun and I could understand more about chapter 1. Looking forward to learn more <3

I would like to have more quizzes

I can understand more about computer in this class :)

Quizz help me more understand about Chapter 1

I think it would be nice to have more quizzes.

Before this, I don't know anything about IT Infrastructure, but now I can understand. Also Quizziz really help me to understand more

Overall what I can conclude in this topic is about IT include hardware and software that we use it in our daily life. And can I say that quiz is more fun than discussing in group because sometime it could be so passive and boring.

From this topic, I now understand the history and the importance of software technology in the day-to-day management of companies as well as new trends. -Z

To add on, I also have found out about the new innovations on everyday life that is rooted in technology as well as recycling e-waste for a multitude of purposes.

Hi, Dr. Noradila I like the way that Dr. teaches us such as showing us pictures of the mainframe and minicomputer. It helps me to have a better understanding.
