

From offline to online - How does the banking sector keep up in the current pandemic situation?

What have you learned? Feedback?

ADILA NORDIN NOV 11, 2021 08:41AM

Thankyou dr Adila for arrange this program. I have learned so many things and gained my knowledge from this program. I know about layout of a vc room in it infrastucture. Then, about network and telecommunication and others things. Also about technologies in banking sector.

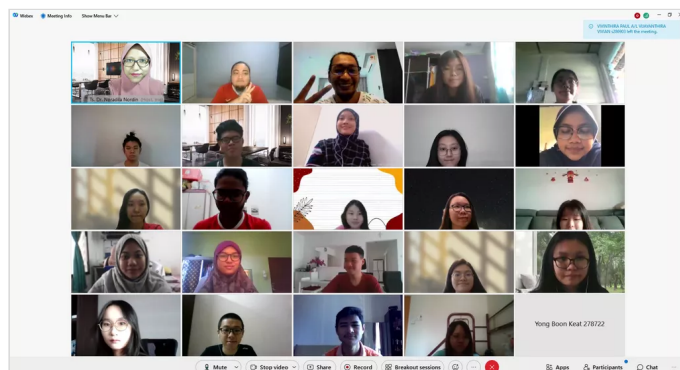

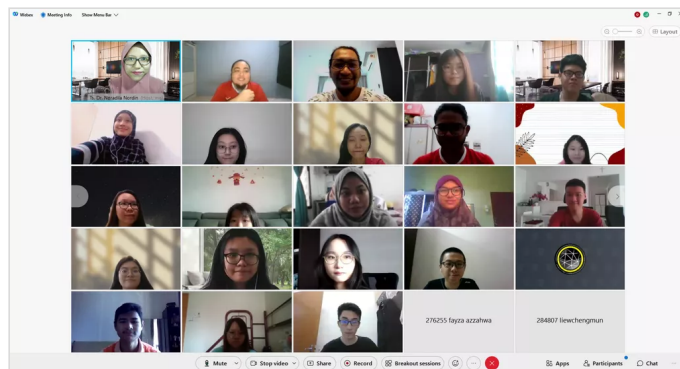

Feedback

I really appreciate this program has been organized. This program gives an opportunity, especially to students to explore more about IT infrastructure in the banking sector. The speakers and MC had done their best to deliver and make this program successful. Thank you.

FEEDBACK

Hi Dr. Thank you for organized an amazing and knowledgeable program for me. In the program now I knew that how to secure my database when I am outside from home. It is very useful ways for me to consume during the current pandemic situation. Thus, I hope I will joining your upcoming programmes again. Thank you.

Thanks dr for planning this programme. I did learn a lot of new knowledge about the IT infrastructure in the banking sector. I was amazed for the services provided by the banking sector such as Bluejeans meeting and event, REALPRESENCE TOUCH, VC room and so on. I had also know the issue faced by the sector and how to work securely outside the office. This talk widen my mind. Thanks for the two speakers today for making an amazing and meaningful talk.

Feedback

I have learned many things from this program. This program had let me know about the layout of the Video Conference room and also the technology that is using to share screen and give microphone to present by the speaker. I also know about which service is suitable for more attendee. So, thanks to Dr for preparing this program.

FEEDBACK PROGRAM

From what I heard during the program, I am more in favor of the system and technology to ensure that all data and information of Standard Chartered staff and customers are always at a secure level, to prevent this information from being misused by certain parties even SC staff themselves. So with the most sophisticated system at the moment used by the SC is the best and can be emulated and used as a guide to organizations other than the Bank

Feedback

The session so interesting, it makes me be more want to beware and never use the public network again! And want to secure my mobile phone, laptop and my house 🛡️ from those unsecure network that could attract hackers/spy to get me and my family information.

I also, learn a lot of things of bank and others industry device tools that they use to coop in this pandemic situation and hope our country would be more acceptable and grow big in technology so that we are not left behind.

Feedback

Thank you Dr for arranging this program. I gain new knowledge about bank sector, about database and how it

work. I also know about the product that they provided for video conference. Really interesting. Thank you again dr

FEEDBACK

Overall this is a good talk for me, thanks you Dr for arranging this talk. From this talk i have getting a lot of knowledge and information on IT application that applied by bank sector and also get to know how their use when in pandemic. Hopefully have more talk like this in future, thank you Dr.

Feedback

From what is currently shared during the talk just now, I have learned that it's necessary for banks to continue playing a significant role in shaping the recovery and helping their customers rebuild their financial security and business health with many banking technologies. I also just found out there are several components that have been used in the banking sector such as POLY STUDIO X50, HDX 7000, GROUP 500 and lot more xD. I can say it's quite difficult for me to adapt with the new thing but it's okay, so far so good. I enjoy the session. Thankyou Dr. :)

Thank you Dr for arranging this talk. I have gain more knowledge from this talk which is from database, in banking scene data is everywhere. Customer/users/clients is able to access them at any place. The management information is all about deriving information from Bank's other activities and also financial services companies are heavily regulated. Next, In technologies in the Banking sector, for SC, they have numerous hardware and software related to video conferencing. For examples, POLY STUDIO X50, HDX 7000, GROUP 500, GROUP 310 AND REALPRESENCE TOUCH. It's quite interesting to know this technologies.

Feedback

Thank you Dr for arranging this meaningful talk. I get more knowledge and also information on how IT applled with bank sector when this pandemic still goes on. Hopefully this will help me in the future. By the way, Thank You Dr.

Feedback

From the talk I get more knowledge on how the financial area proficient to adapt during this pandemic. Besides that, I received a lot of information on how IT application applied with bank sector during pandemic. Overall it was a good talk and received a lot new knowledge. Thanks Dr. Noradila for arranging such a meaningful talk.

Feedback regarding the topic discussed.

It was a very effective meet conducted by Dr. Noradila since we get learn more about how does the banking sector capable to cope up with the pandemic season which shared by the Tech Support Rep from Standard Chartered today. They shared alot about ICT applications that been using by the organization currently. I also get to learn more about

risks involved working outside and inside the office. They also share regarding the devices used during conferences among working colleagues. I hope to have more sharing like this in future from organizational workers and alumni maybe. Thank you Dr. Noradila.
